

Journal of Contextual Economics

Schmollers Jahrbuch

Edited by Peter J. Boettke, Nils Goldschmidt, Stefan Kolev,
Stephen T. Ziliak and Joachim Zweynert

Economics is social science. This central idea guiding the *Journal of Contextual Economics – Schmollers Jahrbuch* since its founding in 1871 has lost none of its relevance. Ever more scholars have discovered that an »isolating« economics that removes economic processes from their social, historical, ethical, and ecological contexts in the interest of applying certain formal methods runs the danger of missing important aspects of economic reality.

In philosophy, the humanities, and the social sciences, contextualism has grown in importance over the last several years, a core postulate of which is that a fuller understanding of human thought and action requires a grasp of the context in which they are embedded. In line with its original intention, the main objective of *Journal of Contextual Economics – Schmollers Jahrbuch* is to offer such newer research a forum in which economic life is set in relation to its social and physical environment, particularly where the interface between the economic system and the other systems is studied.
